

## Environmental Policy

We at Pacific Coilcoaters will strive to be better every day by committing to working with the Public, Industry, and regulatory bodies to help protect the Environment by reducing the environmental impacts associated with our manufacturing processes and the distribution and use of our building materials.

Together we will:

- Ensure we comply with all regulatory and legal requirements to operate and Fletcher Building Standards.
- Commit to implementing measures to help prevent pollution and protect the environment.
- Maintain a management system that includes identification and evaluation of the environmental risks associated with our business activities.
- Set objectives and targets on a risk-based approach that prioritises controls and programmes for critical environmental risks.
- Review and report on our environmental performance on a regular basis.
- Identify raw materials ( steel, paint, chemicals, packaging materials, and energy sources ) that can have the least impact to the environment.
- Control our abnormal activities ( i.e., capital upgrades and other initiatives ) to reduce environmental impacts.
- Plan to store operational quantities of hazardous substances ( Paint, chemicals, and solvents ) to have minimum environmental effects during emergency situations.
- Commit to supporting training programmes to improve knowledge that will help continual improvement in the environmental work practices.
